

## COSPAR Member News

### ISPRS

The International Society for Photogrammetry and Remote Sensing (ISPRS, [www.isprs.org](http://www.isprs.org)) is a non-governmental organization devoted to the development of international cooperation for the advancement of photogrammetry and remote sensing, and their applications. It was founded by Prof. Eduard Doležal as the International Society for Photogrammetry in Vienna, Austrian-Hungarian Monarchy, in 1910. Remote Sensing, a younger “sister” science, focused on acquisition, processing and visualisation of images of the Earth and other space bodies, has become not only one of the topics ISPRS members is working with, but also a part of the Society name. Read an [overview of ISPRS](#).
