Jerome.Benveniste@esa.int

Chair of Sub-Commission A2 on *Ocean Dynamics and Productivity*

FUNCEME-COSPAR Training and Capacity Building Course on Earth Observation Understanding of the Water Cycle Over Land and Ocean

The FUNCEME-COSPAR Training and Capacity Building Course on Earth Observation Understanding of the Water Cycle Over Land and Ocean took place in Fortaleza, Brazil from 1st to 12th November 2010 (http://www.funceme.br/eos.cospar). FUNCEME (Fundação Cearense de Meteorologia e Recursos Hídricos), the host institution, is a nonprofit regional Institute, linked to the State Government of Ceará and located in the city of Fortaleza, that develops activities in the areas of Meteorology, Environmental Resources and Water Resources (http://www.funceme.br). The lectures, both theoretical and practical, were developed at the Instituto Aldys Mentor from Fortaleza (http://www.aldymentor.org.br/src/frmPrincipal.aspx). This Institute is a non-profit institution dedicated to promote human and social development and integrate less educated citizens in the digital world. The Institute has a first-class infrastructure in lecture rooms and computing and audiovisual equipment which was lent to the Course in an altruistic way. Students and lecturers were accommodated at the Hotel Beira Mar Fortaleza, Fortaleza.

The main aim of the two-week COSPAR Panel on Capacity Building Course was to train postgraduate students and young researchers from different countries of the world, especially from Latin America, to improve their understanding and observations of the Water Cycle from space. The activities of this educational project were framed within the COSPAR Scientific Commission A on Space Studies of the Earth's Surface, Meteorology, and Climate, and more specifically within Sub-Commissions A2 on Ocean Dynamics and Productivity and Sub-Commission A3 on Land Processes and Morphology.

The postgraduate students and young researchers proceeded from a variety of scientific backgrounds from different Earth Science disciplines and wished to expand and improve their knowledge and skills on remote sensing techniques applied to water cycle studies.

The web site of the course received 70 applications from: Argentina, 7; Austria, 1; Belgium, 3; Brazil, 27; Canada, 1; Chile, 1; China, 2; Colombia, 1; Denmark, 1; Egypt, 1; Germany, 3; India, 7; Indonesia, 1; Japan, 1; Mexico, 4; Nepal, 2; Netherlands, 1; Russia, 3; USA, 2; and Vietnam, 1. After the detailed analysis and study of the Scientific Committee, 30 students were selected, many of them from less developed countries, and who fulfilled the main requirements for capacity building, that is, to be able to transfer the knowledge they would acquire to their respective institutions. See the final list of attendants in Appendix 1a.

The main goals of the course were to improve our understanding of the hydrological cycle, using data obtained by satellites. In addition, the course also was seeking to:

- i. increase the knowledge on how to access and use public archives of data generated from satellite sensors depending from different Agencies such as ESA, INPE, NASA and NOAA
- ii. instruct the participants, through theoretical and practical lectures to use specialized toolboxes to extract data from satellite images and generate products with a special attention given to soil moisture and ocean salinity, and
- iii. promote professional and institutional relationships between students and experienced lecturers from the institutions mentioned in the attachment

The course included lectures covering issues related to a general introduction on water cycle studies, both over the land and over the ocean, statistical data analysis as well as an introduction/revision of remote sensing concepts, principles, methodologies, and applications, such as: Introducing Satellite Remote Sensing; Digital Image Processing Techniques, Remote Sensing Applications for Land, Ocean and Atmosphere, Validation of Remote Sensing Data and Products, and Assimilation of Remote Sensing Data and Products in Numerical Prediction Models. Special attention was dedicated to train the students in the knowledge of SMOS (*Soil Moisture and Ocean Salinity*) ESA's Water Mission, by means of a thorough explanation of the different SMOS

data and products, as well as the training on the different ESA toolboxes. The Programme Contents and the Detailed Programme of the Course is given in Appendix 2. The students had the opportunity to present their work during a special session (Appendix 3).

Lecturers of the Course were researchers specialists in the different topics (see Appendix 1b and the Detailed Programme of the Course in Appendix 2) and proceeded from:

- AEB Agência Espacial Brasileira Brazil
- CESBIO Centre d' Etudes Spatiales de la BIOsphère France
- CONAE Comision Nacional de Actividades Espaciales Argentine
- ECMWF European Centre for Medium-Range Weather Forecasts United Kingdom
- ESA-ESRIN European Space Agency Italy
- FUNCEME Fundação Cearense de Meteorologia e Recursos Hídricos Brazil
- ICM Institut de Cièncias del Mar Spain
- INPE Instituto Nacional de Pesquisas Espaciais Brazil
- IOUSP Instituto Oceanográfico da Universidade de São Paulo Brazil
- ITIC Instituto de Tecnologia da Informação e Comunicação Brazil
- IRD Institut de Recherche pour le Développment France
- NOAA National Oceanic and Atmospheric Administration USA
- RMIB Royal Meteorological Institute of Belgium Belgium
- UFBa Universidade Federal da Bahia Brazil
- UFCG Universidade Federal de Campina Grande Brazil
- UVEG Universitat de València Estudi General Spain

Finally, we would like to emphasize that the Course was programmed very timely in correspondence with ESA's SMOS Mission. We all know about the recent launch and successful development of the mission, so that we appropriately dedicated special attention to the training of the ESA Toolboxes related to the mission and to the use and exploitation of the different SMOS land and ocean data and products. Moreover, we would like to highlight the contributions of ESA, CESBIO, ICM, ECMWF and the University of Valencia that showed their recent activities in their respective mission assignments, namely retrieval and validation of land and ocean products and their assimilation in ECMWF CMEM (Community Microwave Emission Model).

We would like to thank COSPAR for the support, guidance, assistance and help provided in all the phases of the Course, and ESA, for the continuous collaboration in its organization. Especially, we would like to thank Dr. Volker Liebig, Director of ESA's *Earth Observation Programmes*, ESA/ESRIN, Frascati, Italy, for the significant financial support provided which upgraded and raised the standard of the Course. The soul of this activity has undoubtedly be A. Geraldo Ferreira who, with FUNCEME, poured himself out and dedicated all his efforts and time to the 100% success of the activity. We also acknowledge the support provided by AEB (*Brazilian Space Agency*), INPE (*Brazilian National Institute for Space Research*) and *Aldy Mentor Institute*.

All participants, lecturers and students, recognize the success of the Course. The lecturers had a splendid collaboration, dedication and interaction with the students, at all times, which easily helped us achieve the Course goals. The Appendix 4 contains the outcome of a Questionnaire circulated to the students to give their evaluation of the Course. The missing questions correspond to more elaborated suggestions from the students. But, the last thought and consideration on the Course should be dedicated to the students themselves. From the very beginning to the last instant they all have shown an extraordinary good spirit of companionship that still continues while trying to define and establish some sort of professional networks for further collaboration and true friendship. The Appendix 5 contains a very small sample of the hundreds of pictures taken by the them where one can see that everyone –students and lecturers- is always smiling. Their gratitude was finely expressed in the document (file: FUNCEME_COSPAR_Fortaleza_Brazil_2010_Movie.wmv) that can be freely downloaded from ftp://ftp.funceme.br/FUNCEME_COSPAR/ and which was shown by the students at the Closing Ceremony.

Appendix 1b: Lecturers

- Benveniste, Jérôme (European Space Agency ESA ESRIN, Italy)
- Coelho, Simone Marilene Sievert da Costa (National Inst. for Space Research INPE, Brazil)
- Dinardo, Salvatore (European Space Agency ESA ESRIN, Italy)
- Gonçalves, Luis Gustavo (National Institute for Space Research INPE, Brazil)
- Kampbell, Milton (National Institute for Space Research INPE, Brazil)
- Kuligowski, Bob (National Occeanic and Atmospheric Administration NOAA, USA)
- Lentini, Carlos (Federal University of Bahia UFBA, Brazil)
- Lopez-Baeza, Ernesto (Climatology from Satellites Group, Univ. of Valencia UVEG, Spain)
- Mialon, Arnaud (CESBIO France)
- Muñoz Sabater, Joaquín (European Centre for Medium-Range Weather Forecast, ECMWF, UK)
- Sato, Olga T. (IOUSP, Brazil)
- Silva, Bernardo (UFCG Brazil)
- Sobreira Rocha, Carlos Artur (Inst. de Tecnologia da Informação e Comunicação ITIC, Brazil)
- Talone, Marco (Instituto de Ciencias del Mar ICM, Spain)
- Velazquez-Blazquez, Almudena (Royal Meteorological Institute of Belgium RMIB)

Appendix 2: Programme

The programme includes scientific and technical lectures related to the remote sensing process, sensors, calibration, validation and algorithm development, tutorials and specific aspects of the ESA SMOS Mission, NOAA and SeaWiFS/MODIS Missions, as well as of the forthcoming NASA AQUARIUS missions. The emphasis was put on the practical hands-on dedication to the characteristics of these missions. The contents of the Course are:

I. Programme Contents

(i) General Introduction on Water Cycle Study Guidance

- a. The Water Cycle Processes. The Earth's Water Balance
- b. The Global Water Cycle
 - Terrestrial Water Cycle and the Impact of Climate Change
 - The Ocean Component of the Global Water Cycle
 - Key Remote Sensing Hydrological Observations

(ii) Introducing Satellite Remote Sensing

- a. Principles of Remote Sensing
- b. Interaction of Electromagnetic Energy with Particles in the Atmosphere, Surface and near Surface
- c. Remote Sensing in the Solar and Thermal parts of the Electromagnetic Spectrum

(iii) Digital Image Processing Techniques

- a. Preprocessing
 - Radiometric Correction
 - Geometric Rectification
- b. Image Enhancements
- c. Spectral Transformations
- d. Atmospheric Corrections
- e. Image Classification Techniques

(iv) Statistical Data Analysis

- a. Frequency distributions, Histograms
- b. Measures of Central Tendency (Mean, Median, Mode)
- c. Measures of dispersion (range, variance, standard deviation)
- d. Covariance & Correlation Matrices
- e. Time series análisis
- f. Correlation (Understanding and Interpreting the correlation coefficient: scaterplots, slope of the regression line and z-scores, variance interpretation, calculation of the correlation coefficient, outliers and its effects)
- g. The t Distribution, ANOVA

(v) Physical Principles in Microwave Radiometry

- a. Passive Microwave Systems
 - Microwave Emission Models
 - Land-surface Applications
 - Oceanographic Applications
- b. Radar Systems
 - Radar Altimetry
- c. Microwave Scatterometry
 - Microwave Scatterometry over Ocean Surfaces
 - Microwave Scatterometry over Land Surfaces

(vi) Remote Sensing Applications for Land, Ocean and Atmosphere

- a. Land Applications
 - Earth Radiation Balance, Precipitation, Vegetation Dynamics (General, Biophysical Parameters), Surface Energy Balance (Soil heat flux, sensible and latent heat fluxes, and evapotranspiration) and Radiation Balance (albedo and net radiation)
 - Studies on the Spatial Variability of Soil Moisture in Semiarid Northeast Brazil
- b. Ocean Applications: Sea Surface Temperature and Ocean Color
 - Fundamentals of satellite oceanography: ocean color and thermal infrared
 - · Sensors for observing ocean color and sea surface temperature
 - · Space and time scales in satellite oceanography
 - Web-based satellite data sources
 - Examples of Applications and Case Studies
- c. Earth's Radiation Balance
 - Surface Energy BudgetBowen ratio-energy balance method
 - Eddy correlation
 - Evapotranspiration
 - Radiative transfer codes to study the Earth's radiation budget
- d. Remote Sensing Applications for Land and Ocean. Hydrological Balance
 - Precipitation
 - Retrieval Theory and Combination Algorithms
 - Surface Conditions
 - Algorithms and Products
 - GOES-R (the next generation of GOES)...next-generation algorithms and new products

(vii) Validation of Remote Sensing Data and Products

- a. Land Products
 - CBERS, LANDSAT, MODIS, NOAA, SMOS, ...
 - NDVI, Soil Moisture, Vegetation Water Content
- b. Ocean Products
 - NOAA, SeaWifs, SMOS, ...
 - Sea Surface Salinity

(viii) The SMOS Mission

- a. Land and Ocean Products
- b. SMOS Level 1, 2 and 3 and SMOS Cal/Val
- c. ESA Toolboxes and Data Use

(ix) Assimilation of Remote Sensing Data and Products in Numerical Prediction Models

- a. Basic Concepts
 - General Introduction to Data Assimilation
 - Direct Insertion and Nudging
 - Optimal Interpolation
 - Variational DA (1,2,3 and 4-DVar)
 - Kalman Filters
- b. Operational Data Assimilation
 - Worldwide
 - CPTEC/INPE
- c. Local Ensemble Transform Kalman Filter
- d. Land Data Assimilation Systems
 - NLDAS
 - GLDAS
 - The South American Land Data Assimilation System

II. Detailed Programme Finally Developed

DAY 1 - Monday		
TIME	TOPIC	TEACHER
08:30 - 9:30	Registration	
9:30 – 10:30	Opening Ceremony	Organizers and Authorities FUNCEME, COSPAR, ESA, INPE,
10:30 - 11:00	Coffee Break	·
11:00 – 11:45	ESA Living Planet Programme	Jérôme Benveniste <i>ESA</i>
11:45 – 12:30	The Brazilian Space Programme	Carlos Eduardo Quintanilha AEB
12:30 – 14:15	Lunch	
14:15 - 15:00	CONAE and SAC-D Space Plan	Mónica Rabolli <i>CONAE</i>
15:00 – 15:30	Course Introductory Talk	Course Organization
15:30 – 17:00	Introducing Satellite Remote Sensing	Simone M. S. da C. Coelho //NPE
19:30 – 21:30	Ice Breaker (Hotel Beira Mar)	

	DAY 2 - Tuesday		
TIME	TOPIC	TEACHER	
08:00 – 10:00	Key Concepts in Remote Sensing	Simone M. S. da C. Coelho //NPE	
10:00 - 10:30	Coffee break		
10:30 – 12:30	Key Concepts in Remote Sensing	Simone M. S. da C. Coelho //NPE	
12:30 - 14:00	Lunch		
14:00 – 16:00	Statistical Data Analysis	Carlos Arthur S. Rocha /T/C	
16:00 - 16:30	Coffee break		
16:30 – 18:30	Statistical Data Analysis	Carlos Arthur S. Rocha /T/C	
		·	
	Free time	·	

DAY 3 - Wednesday		
TIME	TOPIC	TEACHER
08:00 - 10:00	Statistical Data Analysis	Carlos Arthur S. Rocha /T/C
10:00 - 10:30	Coffee break	
10:30 - 11:30	The Global Water Cycle (i) Terrestrial Component: Soil Moisture	Ernesto Lopez-Baeza <i>UVEG</i>
11:30 – 12:30	Remote Sensing Applications for Land/Atmosphere: Earth Radiation Balance (Part I)	Ernesto Lopez-Baeza/Antonio Geraldo Ferreira UVEG/FUNCEME
12:30 – 14:00	Lunch	
14:00 – 16:00	Remote Sensing Applications for Land/Atmosphere: Earth Radiation Balance (Part II)	Almudena Velazquez Blazquez <i>RMIB</i>
16:00 - 16:30	Coffee break	
16:30 – 18:30	Remote Sensing Applications for Land/Atmosphere: Earth Radiation Balance (Practical Part)	Almudena Velazquez Blazquez <i>RMIB</i>
	Free time	

DAY 4 - Thursday		
TIME	TOPIC	TEACHER
08:00 – 10:00	Remote Sensing Applications for Land: Vegetation Dynamics (General, Biophysical Parameters), Surface Energy Balance (I)	Bernardo Silva <i>UFCG</i>
10:00 - 10:30	Coffee break	
10:30 – 12:30	Remote Sensing Applications for Land: Vegetation Dynamics (General, Biophysical Parameters), Surface Energy Balance (II)	Bernardo Silva <i>UFCG</i>
12:30 – 14:00	Lunch	
14:00 – 16:00	Remote Sensing Applications for Land: Vegetation Dynamics (Practical part) (I)	Bernardo Silva <i>UFCG</i>
16:00 – 16:30	Coffee break	
16:30 – 18:00	Remote Sensing Applications for Land: Vegetation Dynamics (Practical part) (II)	Bernardo Silva <i>UFCG</i>
21:30	** Typical Night in the <i>Future Beach</i>	

DAY 5— Friday		
TIME	TOPIC	TEACHER
08:00 – 10:00	Remote Sensing Applications for Ocean: SST	Milton Kampbell / Carlos Lentini INPE / UFBa
10:00 - 10:30	Coffee break	
10:30 – 12:30	Remote Sensing Applications for Ocean: Ocean Colour	Milton Kampbell / Carlos Lentini INPE / UFBa
12:30 - 14:00	Lunch	
14:00 – 16:00	Remote Sensing Applications for Ocean: SST (Practical Part) (ctd.)	Milton Kampbell / Carlos Lentini INPE / UFBa
16:00 - 16:30	Coffee break	
16:30 – 18:30	Remote Sensing Applications for Ocean: Ocean Colour (Practical Part) (ctd.)	Milton Kampbell / Carlos Lentini INPE / UFBa
20:30 - 23:30	Formal Dinner (Sal e Brasa Churrascaria)	

DAY 6- Saturday		
TIME	TOPIC	
08:00 - 10:00	Oral Presentation (10 min each)	Students
10:00 – 10:30	Coffee break	
10:30 – 12:30	Oral Presentation (10 min each)	Students
	Free time	

	DAY 7- Sunday
TIME	TOPIC
	Free time

^{**} Participants interested in these events must cover their own expenses.

DAY8-Monday		
TIME	TOPIC	TEACHER
08:00 - 10:00	Physical Principles in Passive Microwave Radiometry	Ernesto Lopez-Baeza <i>UVEG</i>
10:00 - 10:30	Coffee break	
10:30 – 12:30	Physical Principles in Active Microwave Radiometry. Radar Systems	Olga T. Sato <i>IOUSP</i>
12:30 - 14:00	Lunch	
14:00 – 16:00	ESA Toolboxes and Data Use (SAR)	Salvatore Dinardo ESA-ESRIN
16:00 – 16:30	Coffee break	
16:30 – 18:30	Radar Altimetry	Salvatore Dinardo ESA-ESRIN
21:00	** One night at Bar PIRATA " The Craziest Monday in the World"	

DAY 9- Tuesday		
TIME	TOPIC	TEACHER
08:00 - 10:00	ESA Toolboxes and Data Use (Radar Altimetry)	Salvatore Dinardo ESA-ESRIN
10:00 - 10:30	Coffee break	
10:30 – 12:30	Microwave Scatterometry	Salvatore Dinardo ESA-ESRIN
12:30 – 14:00	Lunch	
14:00 – 16:00	The SMOS Mission (Introd. Products Orbit. Level1)	Arnaud Mialon CESBIO
16:00 - 16:30	Coffee break	
16:30 – 18:30	SMOS Level 2 Land Products	Arnaud Mialon CESBIO
	Free time	

DAY 10- Wednesday		
TIME	TOPIC	TEACHER
08:00 - 10:00	SMOS Level 2 Ocean Products	Marco Talone 1CM
10:00 – 10:30	Coffee break	
10:30 – 11:30	SMOS Level 3 Ocean Products	Marco Talone ICM
11:30 - 12:30	SMOS Level 3 Land Products	Ernesto Lopez-Baeza / Dr.Arnaud Mialon UVEG / CESBIO
12:30 – 14:00	Lunch	
14:00 – 15:00	SMOS Cal/Val Land Products	Ernesto Lopez-Baeza <i>UVEG</i>
15:00 - 16:00	SMOS Cal/Val Ocean Products	Marco Talone /CM
16:00 - 16:30	Coffee break	
16:30 – 18:30	ESA Toolboxes and Data Use (BEAM, SMOS,)	Salvatore Dinardo ESA-ESRIN
21:00	** Typical Brazilian Sho	W

DAY 11- Thursday		
TIME	TOPIC	TEACHER (tbc)
08:00 – 10:00	Assimilation of SMOS Data and Products in Numerical Prediction Models	Joaquin Muñoz <i>ECMWF</i> (Video Conference)
10:00 - 10:30	Coffee break	
10:30 – 12:30	Visit to FUNCEME	Antonio Geraldo Ferreira <i>FUNCEME</i>
12:30 - 14:00	Lunch	
14:00 – 16:00	Assimilation of Remote Sensing Data and Products in Numerical Prediction Models	Luis G. G. de Gonçalves <i>INPE</i>
16:00 - 16:30	Coffee break	
16:30 – 18:30	Assimilation of Remote Sensing Data and Products in Numerical Prediction Models	Luis G. G. de Gonçalves <i>INPE</i>

	DAY 12- Friday					
TIME	TOPIC	TEACHER				
08:00 - 10:00	Remote Sensing for Hydrometeorological Applications	Bob Kuligowski <i>NOAA</i>				
10:00 - 10:30	Coffee break					
10:30 – 12:30	Remote Sensing for Hydrometeorological Applications	Bob Kuligowski <i>NOAA</i>				
12:30 - 14:00	Lunch					
14:00 – 15:00	The PIRATA Program: History, Accomplishments and Current Results	Jacques Servain IRD-FUNCEME				
15:00 - 16:00	Closing Ceremony	FUNCEME, Course Organizers				
	Free time					

III. Acronyms

AEB - Agência Espacial Brasileira - Brazil

CESBIO – Centre d' Etudes Spatiales de la BIOsphère – France CONAE – Comision Nacional de Actividades Espaciales – Argentine

ECMWF – European Centre for Medium-Range Weather Forecasts – United Kingdom

ESA-ESRIN - European Space Agency - Italy

FUNCEME - Fundação Cearense de Meteorologia e Recursos Hídricos - Brazil

ICM - Institut de Cièncias del Mar - Spain

INPE - Instituto Nacional de Pesquisas Espaciais - Brazil

IOUSP – Instituto Oceanográfico da Universidade de São Paulo – Brazil ITIC – Instituto de Tecnologia da Informação e Comunicação – Brazil

IRD - Institut de Recherche pour le Développment - France
NOAA - National Oceanic and Atmospheric Administration - USA
RMIB - Royal Meteorological Institute of Belgium - Belgium

UFBa - Universidade Federal da Bahia - Brazil

UFCG – Universidade Federal de Campina Grande – Brazil UVEG – Universitat de València – Estudi General – Spain

Appendix 3: Students Presentations

Verónica Barraza Bernadas

Analysis of Floods and Droughts Events in the Bermejo River Basin: Contribution of Microwave Remote Sensing in Monitoring and Prediction

Khalid Guma Biro

Manifestation of Land Use/Land Cover Change Analysis and Its Impacts on Soil Properties in Gadarif Region, Sudan

Joao Carlos Carvalho

Retrieve of Temperature and Moisture Vertical Profile from Satellites Data Quantitative Analysis Techniques to Water Quality Monitoring

Maria Eugenia Dillon

Application of the Latest Developments in Numerical Models Oriented to Weather Forecasting in the National Weather Service. Environmental Vulnerability and Socioeconomic Impact Studies

Pamela Dominutti

Environmental Risk Assessment by Floods in the North Area of Concepción del Uruguay City Using Geographical Information Tools

Carlos E. Fagiolo

Development of a Set of Surface Data for Modeling the Earth System

Julio A. García Leal

Precipitation Statistical Characterization Series in Bogotá Towards the Implementation of Mathematical Models for Completing Missing Data Using Weather radar and Satellite Technology

Sara Hamdy Abd el Mawla el Adham

Svetlana Karimova

Satellite Observations of the meso- and submesoscale eddies in the Baltic and Black Seas

Anabel Lamaro

Use of Remote Sensing in Monitoring Algal Blooms in Inland Water Bodies

Venkata Mahalakshmi

Influence of Land Use Land Cover (LULC) on Cyclone Track Prediction – A Study During AILA Cyclone

Sergio Masuelli

Modelado Espacio-Temporal de la Densidad de Culicidos en Escenarios Heterogéneos Derivados de Información de Sensores Remotos

Wagner Melciades

MSG2 Image Reception System at FUNCEME

Alejandra Molina

In the Search for Non Conventional Energy Sources in Chile

J. Richard Otukei

Analysis of Polarimetric SAR data for Land cover mapping in Mountainous Landscape

Rodrigo C.D. Paiva

Hydrological and Hydrodynamic Modelling in the Amazon River Basin

Kleber R. da Paixão Ataíde

Meteorological and Environmental Data in Data Base PostgreSQL (PostGIS / WKT Raster) and Querying by Web

Jilong Peng

X-ray and EUV CCD Camera

Eli Pérez

Seasonal and Interannual Variation of Gas Exchange (Carbon Dioxide and Water Vapour) Between the Biosphere and the Atmosphere of Seasonally Dry Ecosystems in Arid and Semi-arid Zones

Romina Ruscica

Atmosphere-Soil Moisture Interaction Over the La Plata Basin in South-Eastern South America

Pablo Spennemann

Characterization of the Hydrological Cycle over South America, Using Analysis and Regional Models

Eduardo da Silva Gigliotti

Interannual Marine Variability on Southeast Brazilian Bight and its Relationship to the Spawning Habitats of Brazilian Sardine (Sardinella braziliensis)

Tonantzin Tarin Terrazas

Vegetation Responses to Precipitation Pulses. Relationship Between the Availability of Rain and Ecosystem Production

Aline Valério

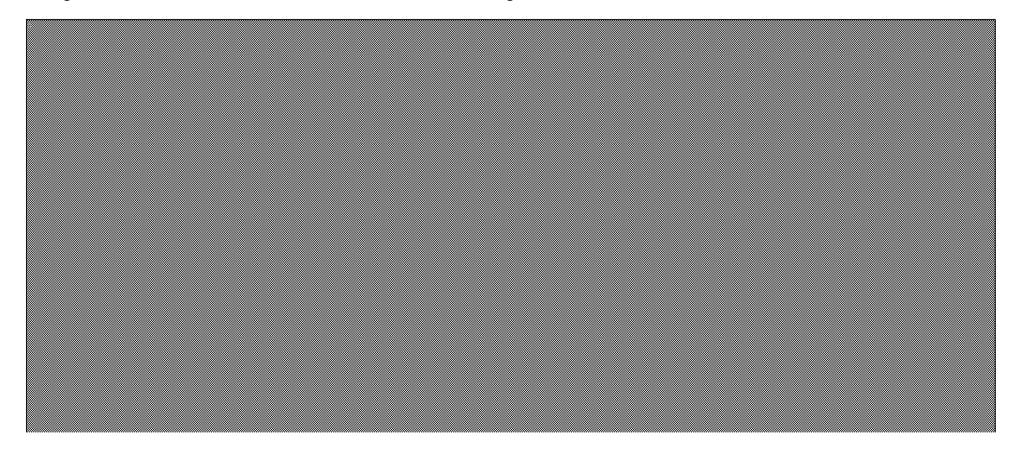

The Use of MOD09 Product and In Situ Data in a Reservoir

Hesong Wang

Appendix 4: Students Course Evaluation

Outcome of the Evaluation Questionnaire circulated among the students to gather their suggestions for further editions of this Course. The questions missing were more elaborated answers which will be included at a later stage

Appendix 5: Some Representative Pictures

Inauguration of the Course

Lecture Room

The first lecture was actually given by Jèrôme Benveniste from ESRIN via *skype*. See him on the *skype* window placed on top of the normal screen

Ice breaking cocktail: Always smiling from the beginning. Left: Alejandra (Argentina), Tonantzin (Mexico) and Richard (Uganda). Right: Kleber, Rodrigo and Joao Carlos from Brazil, Biro from Sudan and Carlos Eduardo, also from Brazil

Left: Aline (Brazil) between Peng (China) and Mahalakshmi (India) Right: ... and now, between Sara (Egypt) and Richard (Uganda)

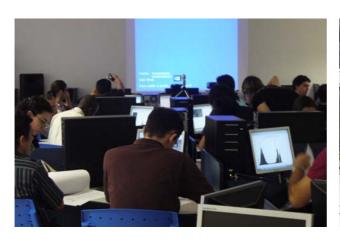

Left: Almudena's practical lecture on radiative transfer. Right: Bernardo's lecture on surface energy balance fluxes

Lecture at FUNCEME

Practical lectures with first-class computers

Visiting FUNCEME

We are in Latin America! ... dancing classes for free!: Left: Pamela (Argentina) shows tango to Vinicius (Brazil) during a coffee break. Center: Richard (Uganda) was very lucky, Pamela (Argentina) and Tonantzin (Mexico) were his teachers of salsa after the formal dinner. Right: Hesong (China) was also learning salsa from Aline (Brazil). Afterwards he just could not stop his feet moving and following the rh ythm ...

- Let's see, Mr So and So ... Why don't you want to come to the lectures today? Just look at me, I am eager to get to the Institute.

Very good atmosphere ... always! Waiting for the bus to take us to the Institute. From left to right: Sara (Egypt), Richard (Uganda), Svetlana (Russia) Vinicius (Brazil), Peng (China), Kleber (Brazil) ... and reflected in the glass, Joao Carlos (Brazil) and Julio (Colombia)

Coffee breaks were always a success and very much appreciated because of the large variety of tropical juices and Brazilian cakes and cookies ... But (Right): Sara (Egypt) and Mahalakshmi (India) could also make a good use of time ... (Top) Anabel (Argentina). (Left): Nilo (Brazil), Maria Eugenia (Argentina) and Vinicius (Brazil)

Students' presentations: Top: Biro (Sudan). Left: Veronica (Argentina). Right: Mahalakshmi (India)

Nice "family picture" of the Argentinians with their *mate*. Veronica, Pablo, Romina, Pamela and Maria Eugenia
10

Happy Birthday dear Hesong, ... Happy Birthday to you

Sunday excursion to ... three different beaches!!!

Oh! Sorry, I forgot. In the end, Richard learnt *tango* as much as he understood the water cycle thanks to Pamela's dancing classes every now and then during the coffee breaks ...

COSPAR Training and Capacity Building Course on Earth Observation Understanding of the Water Cycle, FUNCEME, Fortaleza, Ceará, Brazil, 01 – 12 November 2010
